There is a wide range of fire protection equipment used in a single building to maintain fire safety standards.

Fire protection systems and equipment are required to be in a functional state that allows them to operate at all times.

Undertaking regular maintenance in line with an industry-wide standard is one way of improving the reliability of fire protection systems and equipment that benefits all stakeholders.

After completing this training, the student will have the required skills, knowledge and procedures to inspect test and maintain independent smoke alarms in accordance with AS1851.

Currently, in Australia, each State and Territory has a unique regulatory system that governs the minimum requirements for maintenance of fire protection systems and equipment.
Some jurisdictions have non-specific provisions that simply require the owner of a building to ensure that such systems and equipment continue to perform to a standard no less than that to which they were initially designed and installed. Other jurisdictions have precise regulatory requirements that can vary from building to building.

Students are advised to check their State or jurisdiction regulatory licencing requirements before registering.

It is essential to Axiom Compliance Learning to provide quality training and a reduced risk for COVID-19 virus.
We have developed training resources such as online course documentation and templates.
Additional to the online component of the course, the student has access to a trainer who can be emailed or phoned, and the student coordinator is available for support.

Link to enrolments available. http://mastersit.com.au/vidatek/wp/rto/axiom

Course fee: $220inc

Payment not required when enrolling; we will contact enrolee and email an invoice.
Full payment of the invoice per student is required to commence training online.

Independent battery operated smoke alarm inspection and maintenance does not require a licensed electrical contractor neither does the inspection of mains powered independent smoke alarms.
A licensed electrical contractor is required to maintain, disconnect or install mains powered smoke alarms.

Course Recognition and Completion
Inspecting and Testing of Independent Smoke Alarms is a competency-based training; students will receive a certificate of achievment.

Program Outline and Assessments
This course consists of a short online quiz and the testing and inspecting of four inpendent smoke alarms.
The professionally presented reference material and resources are to assist students in developing their knowledge of the subject. The activities are clearly explained and always relate to the information in the course and Industry, allowing the assessor to ensure the students can apply their knowledge and skills.

Written Reports: Using the provided template and resources, students will produce written records based on real testing and inspections of independent smoke alarms. We provide each student with a template to record these services.

Tasks: Students will undertake a range of tasks that will require the creation of various documents, reports, and outcomes typical in the Industry.

Knowledge Test: Students will undertake a short online knowledge test. Students may research the answers from the course training materials as well as relevant references.

Procedures after enrolment.

- After enrolling online, we will contact the student to discuss their suitability for training.

- Enrolment confirmation will be emailed, including the invoice.

- Following the payment of the invoice, we will confirm receipt via email, including the login details to commence training with the online component.

- The student can login and access the course resources, and commence the training.

3 months to complete from the training date.

Extension available for $100- 2months

How to enrol?

Enrol online, www.axiomcompliancelearning.com.au, training dates tab, choose the course, and complete registration.

Student Information

Detailed student information is available within our Student Handbook, supplied with the enrolment confirmation. This booklet contains essential information about a student's rights and obligations, such as their right to privacy, a safe training environment, and the right to complain or appeal an assessment decision.
Persons applying for enrolment must have an opportunity to review this information.
Our Student Handbook is located on our website.

For any further assistance, contact us, we are here to help.
