REEL

CPP20521 Certificate II in Fire Protection Inspection and Testing

Thank you for your interest in pursuing training with Axiom Compliance Learning.We are pleased to offer the Certificate II in Fire Protection Inspection and Testing.
This course is designed for individuals seeking certification as fire protection technicians responsible for the inspection and testing of extinguishers, fire blankets, emergency lighting, fire doors and to fulfill the requirements for the registration of restricted plumbing work in "Hydrant and hose reel 'test and inspect'"

Our course is designed to equip you with the necessary skills and knowledge to succeed in this field, and we look forward to supporting you throughout your training journey.

UNITS COMPLETED IN CERTIFICATE II
Compulsory Core units

BSBOPS203	Deliver a service to customers
BSBPEF202	Plan and apply time management
CPPCMN2002	Participate in workplace safety arrangements
CPPFES2004	Identify and report on types of installed fire safety equipment &systems
CPPFES2005	Demonstrate first attack firefighting equipment
CPPFES2006	Prepare for installation and servicing operations
CPPFES2007	Maintain quality of work and promote continuous improvement

Elective Units of Competency

CPPFES2003	Safely move loads and dangerous goods
CPPFES2010	Inspect and test fire hose reels
CPPFES2011	Install portable fire extinguishers fire cabinets and fire blankets
CPPFES2020	Conduct routine inspection and testing of fire extinguishers and blankets
CPPFES2026	Inspect and test and inspecting of emergency and exit lighting
CPPFES2035	Identify inspect and test fire and smoke doors

LICENSING/REGULATORY INFORMATION
In this field, it is crucial for all work to adhere to applicable legislation and industry standards. It's worth noting that certain installation, replacement, maintenance, and repair functions may only be performed by licensed trades or occupations and not by technicians. Regulatory mechanisms differ between states and territories, so students should confirm any regulatory limitations that may apply to this qualification in their specific location. By staying informed about regulatory requirements and industry standards, technicians can ensure that they provide the best possible service while also complying with regulations and promoting safety.

TRAINING RECOGNITION
The training units provided by Axiom Compliance Learning are nationally accredited and follow the national vocational education and training standards regulated by the Australian Skills Quality Authority (ASQA). This means that employers, industry bodies, licensing, and other relevant organisations throughout Australia recognise the quality of the training. When learners successfully complete a nationally accredited training course, they are awarded a nationally recognised qualification or statement of attainment that confirms their competency in a specific field of study.

COMPUTER SKILLS
Students need to be able to use common office programs such as Microsoft Word, and Web browsers.

PROGRAM OUTLINE

Blended learning (also known as hybrid learning) is a method of teaching that integrates technology online learning with traditional instructor-led face-to-face classroom activities with on-the-job tasks.

FACE-TO-FACE TRAINING, The course is a five day block. To ensure the quality of training, the number of participants in each course is limited to 10. This training is facilitated at 47 South Tce, Adelaide MBA. 8am to 4pm

OR

VIRTUAL CLASS ROOM (online with a live trainer). Four day block and additional single day. A virtual classroom is a digital platform designed for learning that employs a delivery format such as Zoom. Here, a live trainer facilitates online training sessions, focusing on critical course content and guiding students on how to navigate through the program. This medium enables real-time engagement through audio and video communication allowing trainers to interact with their students as they participate in learning and assessment activities. 9am to 3pm

ONLINE LEARNING

In addition to the face to face session, this program has a self-paced online learning portion, where students research, prepare and submit their assessments via the Learning Management System (LMS). Students will undertake personal study and develop fire system assessments using templates and available resources based on genuine work performances for evaluation purposes. Students' tasks require them to develop various documents, and service reports, with outcomes commonly found in the industry.
Students will complete knowledge tests at different intervals corresponding to the covered subjects. To research the answers, students can refer to the course training materials, notes, and other relevant references. The training is structured in a logical sequence to enable a step-by-step learning process. The activities are presented in a clear manner. They are directly linked to the course and industry information, allowing assessors to ascertain that students can competently apply their knowledge and skills.

The duration of the course is flexible, with students having up to 6 months to complete the online learning and tasks. The more time students dedicate to the online learning component, the faster they can work through the content and assessment tasks.

Some of the required work performance evidence to complete this course is as follows:

Twenty fire hose reels across a minimum of five different sites including at least five fire hose reels installed in a recess, cupboard or cabinet
Ten extinguishers including at least one of each of the following water, dry chemical, carbon dioxide, wet chemical and foam.
Twenty fire and smoke doors over two different sites
Thirty single point emergency light fittings or exit signs over five different sites
Please note some of the work performance tasks are covered in the face to face training.

CPP20521 Certificate II in Fire Protection Inspection and Testing

COURSE FEE: $2450_no GST on accredited training_

To register your interest go to axiomcompliancelearning.com.au choose training date tab, choose the preferred date and register for enrolment or call our team we can complete over the phone.

SUBSIDISED TRAINING

If you meet the eligibility and entitlement criteria, you can access a subsidised training place this will cover the full course fee.

Check Eligibility
Travel and Accommodation Allowance

To get started, all you need to do is complete the Participant Agreement Form. This form helps us ensure that you're eligible and allows us to collect any necessary information to assist you better.

Before each enrollment and after confirming your eligibility and entitlement, we'll schedule an Upfront Assessment of Need (UAN) with you. This assessment helps us understand your specific needs so we can tailor our support to best suit you. Your success is important to us, and we're here to help every step of the way.

To assist students in their learning journey, Axiom Compliance Learning offers the expertise of highly skilled and motivated trainers and assessors with current industry experience. These professionals create an interactive, engaging, and supportive learning environment to facilitate learning. Additionally, the student management team,is readily available to assist with questions and offer support with online course work,ensuring that students receive the necessary guidance to succeed in their studies.

STUDENT INFORMATION
We offer an in-depth Student Handbook, which is provided along with your enrolment confirmation, that includes essential information. Before enrolling, you can access the handbook on our website to review important details about your rights and responsibilities, including but not limited to your entitlement to privacy, a secure training environment, and the ability to file a complaint or appeal an assessment decision. We encourage all students to take advantage of the opportunity to review this essential information carefully.
**For any further assistance, call; we are here to help.**
