

Fire Protection Inspection & Testing

**CPPFES2035 - Identify,
inspect and test fire and
smoke doors**

CPPFES2035 - Identify, inspect and test fire and smoke doors

Thank you for your interest in pursuing training with Axiom Compliance Learning. We are pleased to offer "Identify, inspect and test fire and smoke doors". Our course is designed to equip you with the necessary skills and knowledge required to identify, inspect and test the operation of fire and smoke doors installed at client premises. Service activities are conducted in compliance in accordance with relevant Codes and Australian standards.

It's worth noting that this course is recognised as one of the competencies required for applying for the FPAS Qualified Accreditation test and Inspect, as well as the Fire Safety Assessment Qualified Accreditation.

We look forward to supporting you throughout your training journey.

LICENSING/REGULATORY INFORMATION

In this field, it is crucial for all work to adhere to applicable legislation and industry standards. It's worth noting that certain installation, replacement, maintenance, and repair functions may only be performed by licensed trades or occupations and not by technicians. Regulatory mechanisms differ between states and territories, so students should confirm any regulatory limitations that may apply to this qualification in their specific location. By staying informed about regulatory requirements and industry standards, technicians can ensure that they provide the best possible service while also complying with regulations and promoting safety.

TRAINING RECOGNITION

The training units provided by Axiom Compliance Learning are national accreditation and are in accordance with the national vocational education and training standards regulated by the Australian Skills Quality Authority (ASQA). This means that employers, industry bodies, licensing, and other relevant organisations throughout Australia recognise the quality of the training. When learners successfully complete a nationally accredited training course, they are awarded a nationally recognised qualification or statement of attainment that confirms their competency in a specific field of study.

PROGRAM OUTLINE

Blended Learning - (also known as hybrid learning) is a method of teaching that integrates technology online learning with traditional instructor-led face-to-face classroom activities with on-the-job tasks.

FACE-TO-FACE TRAINING

The course is delivered in one-day. To ensure the quality of the training, the number of participants in each course is limited. 8am to 4pm

Or

VIRTUAL CLASSROOM (online with a live trainer) one day. 9am to 2pm

A virtual classroom is a digital platform designed for learning that employs a delivery format such as Zoom. Here, a live trainer facilitates online training sessions, focusing on critical course content and guiding students on how to navigate through the program. In addition, this medium enables real-time engagement through audio and video communication, allowing trainers to interact with their students as they participate in learning and assessment activities.

CPPFES2035 - Identify, inspect and test fire and smoke doors

ONLINE LEARNING

In addition to face to face or virtual classroom this program requires a portion of self-paced online learning, where students research, prepare and submit their assessments via the Learning Management System (LMS) Moodle. Students will research online, develop procedures, and employ templates with the available resources based on genuine work performances for evaluation purposes.

Students will complete knowledge tests at different intervals corresponding to the covered subjects. To research the answers, students can refer to the course training materials, notes & other relevant references.

ON-THE-JOB TASKS

Students' on-the-job tasks require them to develop various documents, service reports, and outcomes found in the industry.

The training is structured in a logical sequence to enable a step-by-step learning process. The activities are presented in a clear manner. They are directly linked to the course and industry information, allowing assessors to ascertain that students can competently apply their knowledge and skills.

The duration of the course is flexible, with students having up to 3 months to complete it. The more time students dedicate to the online learning component and on-the-job tasks, the faster they can work through the content and assessment tasks.

To assist students in their learning journey, Axiom Compliance Learning offers the expertise of highly skilled and motivated trainers and assessors with current industry experience. These professionals create an interactive, engaging, and supportive learning environment to facilitate learning. Additionally, the student management team is readily available to assist with questions and offer support with online coursework, ensuring that students receive the necessary guidance to succeed in their studies.

COMPUTER SKILLS

Students need to be able to use common office programs such as Microsoft Word, Excel and Web browsers.

COURSE FEE:

\$420 no gst on accredited training

AFTER ENROLMENT

- After enrolling online, we will contact the student to discuss their suitability for training.
- Enrolment confirmation will be emailed, including the invoice.
- Following the receipt of payment, we will confirm receipt via email, including the login details to start training with the online component.
- When students have logged into our online learning platform, they can access course documentation, instructions, templates, and resources; students are ready to begin the course.
- Students will receive email, text message, and phone correspondence to schedule the face-to-face sessions.

CPPFES2035 - Identify, inspect and test fire and smoke doors

COMPLETION

Upon successfully meeting all the requirements, students will be awarded a record of results and a Statement of Attainment for CPPFES2035 - Identify, inspect and test fire and smoke doors.

VENUE/DATES & TIMES

Axiom Compliance offers face-to-face training at multiple locations across Australia, including Newcastle, Sydney, Byron Bay, Brisbane and Melbourne. Additionally, the company has the capacity to provide onsite training for students across the country.

STUDENT INFORMATION

We offer an in-depth Student Handbook, which is provided along with your enrolment confirmation, that includes essential information.

Before enrolling, you can access the handbook on our website to review important details about your rights and responsibilities, including but not limited to your entitlement to privacy, a secure training environment, and the ability to file a complaint or appeal an assessment decision. We encourage all students to take advantage of the opportunity to review this essential information carefully.

For any further assistance, call; we're here to help.
