CPP30821 Certificate III in Fire Protection Inspection and Testing

Including Pumps, Hydrants, Fire Indicating Panels, Gaseous and Water-based suppression

Thank you for considering Axiom Compliance Learning for your training needs. This Certificate III in Fire Protection Inspection and Testing is a unique opportunity for Fire Protection Technicians. This course is tailored to equip you with the necessary skills for conducting inspections, testing, and maintaining complex fire protection systems servicing related to hydrants, pumps, water suppression systems, fire-indicating panels, and gaseous fire-suppression systems, making it comprehensive and valuable training for professionals in this field.

Our course is not just about theoretical knowledge. It's about developing practical competencies that are directly applicable to your work. The focus is on all units required for the FPAS Qualified Accreditation test and inspect categories 1. Fire Sprinkler Systems, 2. Fire Pumpsets, 3. Fire Hydrant Systems 4. Fire Detection and Alarm Systems 5. Gaseous Fire Suppression Systems, as well as the entry qualification and units related to measures for Fire Safety Assessors' Qualified Accreditation. This means you'll be equipped with the skills you need to excel in your role, giving you the confidence to handle any situation in your field.

LICENSING/REGULATORY INFORMATION

All work must adhere to applicable legislation and industry standards in this field. It's worth noting that certain installation, replacement, maintenance, and repair functions may only be performed by licensed trades or occupations and not by technicians. Regulatory mechanisms differ between states and territories, so students should confirm any regulatory limitations that may apply in their specific location. By being informed about regulatory requirements and industry standards, technicians can ensure that they provide the best possible service while also complying with regulations and promoting safety.

UNITS COVERED

BSBPEF301	Organise personal work priorities
PPCCMN2002	Participate in workplace safety arrangements

Additional units covered:	
CPPFES2029	Conduct functional tests on fire detection, warning, and intercommunication devices
CPPFES2037	Inspect and test fire hydrant systems

TRAINING RECOGNITION

The training units provided by Axiom Compliance Learning are nationally accredited and in accordance with the national vocational education and training standards regulated by the Australian Skills Quality Authority (ASQA). This means that employers, industry bodies, licensing, and other relevant organisations throughout Australia recognise the quality of the training. Upon successfully completing this nationally accredited training course, learners are awarded a nationally recognised Full Qualification, confirming their competency in a specific field of study.

PROGRAM OUTLINE

Blended Learning is a teaching method that integrates technology-based online learning with traditional instructor-led face-to-face classroom activities and practical tasks.

FACE-TO-FACE TRAINING

The course is delivered in one five-day and two two-day blocks. To ensure the quality of the training, the number of participants in each course is limited to 8, Venue 44a Gindurra Rd Somersby 2250.

ONLINE LEARNING

Online learning is completed both within and outside the course, where students research, prepare, and submit their assessments via the eLearning Management System. Students will research, develop procedures, and employ templates with the available resources based on genuine work performances for evaluation purposes. Students will complete interactive online quizzes corresponding to the covered subjects. To research the answers, students can refer to the course training materials, notes & other relevant references.

PRACTICAL TASKS

Students' practical tasks require them to develop various documents, service reports, and testing outcomes found in the industry. We endeavour to complete all practical tasks in this course, but some students may take longer than others. Any remaining tasks can be completed on-site. Students must have access to the necessary equipment at their workplace; alternatively, additional assessment time at the facility can be scheduled at a fee. Practical tasks will be tailored individually based on the specific equipment available in their workplace, especially for tasks requiring specialised equipment not commonly found. Complex sprinkler valve tasks required for the course will be performed in class with a workplace trainer and assessor. The training is structured logically to enable a step-by-step learning process, with activities presented clearly and directly linked to the course and industry information, allowing assessors to ascertain that students can competently apply their knowledge and skills. The course duration is flexible, with students having up to 24 months to complete workplace tasks if not all are completed during class.

STUDENT SUPPORT AT AXIOM

To support students on their learning journey, Axiom Compliance Learning provides the expertise of highly skilled and motivated trainers and assessors with current industry experience. These professionals create an interactive, engaging, and supportive learning environment to facilitate learning. Additionally, the student management team is readily available to assist with questions and offer support with online coursework, ensuring that students receive the necessary guidance to succeed in their studies.

At Axiom, we provide comprehensive support to help our students succeed throughout their training, whether completing homework online or tackling workplace tasks.

Zoom Support Sessions

We host open Zoom meetings, where our trainers are available to assist with any questions or challenges you may encounter during your training. These sessions provide real-time support and guidance and are typically scheduled on Monday or Wednesday nights from 5 p.m. to 7 p.m. For specific dates, please check our website or call our office.

On-Site Support at our Somersby Facility – Friday Student Support Days

We also offer the chance to utilise our new facility in Somersby, Central Coast, NSW, during our Friday Student Support Days. This dedicated time allows you to:

- Complete your online work with our trainers on hand
- Ask questions and receive personalised assistance in a supportive environment
- Complete your work tasks using on-site resources
- Get away from work or home to focus on your training.

For specific dates, please check our website or call our office.

TRAINING AND ASSESSMENT

The training and assessment rules for nationally recognised units/qualifications are available on training.gov.au. All registered training organisations develop their own training and assessment materials, which must meet these rules. When sourcing a training provider, it is always prudent to investigate whether the provider adheres to training package rules and standards for RTO's. Be aware that non-compliance may result in your qualification/certificate being cancelled, particularly where providers take shortcuts with assessment tasks. Axiom Compliance Learning adheres to the standards for RTO's, which is that we deliver quality training and assessment.

COMPUTER SKILLS

Students must be able to use common office programs, such as Microsoft Word, and Web browsers. They must also complete our short student induction before training, which is essential to understanding the use of the e-learning platform.

COURSE FEE

\$5930 excl. no GST on accredited training

Units previously completed are not subject to discounts. The fee structure primarily applies to elective units trained in a structured sequence. All elective units will be part of the training, even if they have been previously completed. Core units are included in this course at no additional cost.

REGISTERING FOR ENROLMENT

- After you express your interest to admin@axiomcompliance.com.au, we will contact you to discuss your suitability for training.
 - Complete the enrolment registration form either on our website or by having our team email you the form.
 - Enrolment confirmation will be emailed with the invoice.
 - After the invoice is paid, you will receive an email with the login details to start the student induction.
 - When students have logged in to our online learning platform, they can access course documentation, instructions, templates, and resources, and are then ready to begin the course.
 - Students will receive an email confirming details of the face-to-face or online Zoom sessions.
- Your success is important to us, and we're here to help every step of the way.

STUDY WITH AXIOM COMPLIANCE LEARNING

We have detailed student information on our website. We encourage all students to take advantage of this opportunity to review this essential information carefully.

- Register For Enrolment
- Fees and Payment
- Student Support Services
- Student Identifier (USI)
- Students' Rights and Responsibilities
- Students' Language Literacy, Numeracy and Computer Skills
- Recognition and Credit Transfer
- Student ELearning Platform
- Forms and FAQs
- Student Video Library
- Preparing for Training
- Our Continuous Improvement of Service
- Location Details

COMPLETION

Students will be awarded a National Qualification upon successfully meeting all the requirements.

VENUE

Axiom Compliance offers face-to-face training at multiple locations across Australia and can provide on-site training for students if numbers permit. Due to the size and complexity of the training equipment, this specific course is only facilitated at 44a Gindurra Rd Somersby NSW 2250.

If you have any questions regarding the information in this brochure, our team are happy to help.
