CPPFES2025 Inspect, test and maintain gaseous fire-suppression systems, CPPFES2043 Prevent ozone-depleting substance and synthetic greenhouse gas emissions

Thank you for choosing Axiom Compliance Learning for your training needs. This course is designed for individuals performing mechanical inspections, testing, and maintenance on installed gaseous fire suppression systems. It offers comprehensive training that adds real value to those working in this critical field. Our focus goes beyond theory—we're committed to building practical skills you can apply directly to your work. By the end of the course, you'll have the skills needed to excel in your role and handle tasks confidently.

LICENSING/REGULATORY INFORMATION

All work must adhere to applicable legislation and industry standards in this field. It's worth noting that certain installation, replacement, maintenance, and repair functions may only be performed by licensed trades or occupations and not by technicians. Regulatory mechanisms differ between states and territories, so students should confirm any regulatory limitations that may apply in their specific location. By staying informed about regulatory requirements and industry standards, technicians can ensure that they provide the best possible service while also complying with regulations and promoting safety.

UNITS COVERED

CPPFES2025 Inspect, test and maintain gaseous fire-suppression systems

CPPFES2043 Prevent ozone-depleting substances and synthetic greenhouse gas emissions

TRAINING RECOGNITION

The training units provided by Axiom Compliance Learning are nationally accredited and in accordance with the national vocational education and training standards regulated by the Australian Skills Quality Authority (ASQA). This means that employers, industry bodies, licensing, and other relevant organisations throughout Australia, recognise the quality of the training. When learners successfully complete this nationally accredited training course, they are awarded a Statement of Attainment that confirms their competency in a specific field of study.

PROGRAM OUTLINE

Blended Learning is a teaching method that integrates technology-based online learning with traditional instructor-led face-to-face classroom activities and practical tasks.

FACE-TO-FACE TRAINING

The course is delivered in a two-day block. 8.30 am to 4 pm

To ensure the quality of the training, the number of participants in each course is limited to 8.

ONLINE LEARNING

Online learning is completed both within and outside the course, where students research, prepare, and submit their assessments via the Learning Management System (LMS). Students will research, develop procedures, and employ templates with the available resources based on genuine work performances for evaluation purposes. Students will complete interactive online quizzes corresponding to the covered subjects. To research the answers, students can refer to the course training materials, notes & other relevant references.

PRACTICAL TASKS

Students' practical tasks require them to develop various documents, service reports, and testing outcomes found in the industry. We endeavour to complete all practical tasks in this course, but some students may take longer than others. Any remaining tasks can be completed on-site. Students must have access to the necessary equipment at their workplace; alternatively, additional assessment time at the facility can be scheduled at a fee. The training is structured logically to enable a step-by-step learning process, with activities presented clearly and directly linked to the course and industry information, allowing assessors to ascertain that students can competently apply their knowledge and skills. Students have 3 months to complete any remaining practical tasks.

STUDENT SUPPORT AT AXIOM

To support students on their learning journey, Axiom Compliance Learning provides the expertise of highly skilled and motivated trainers and assessors with current industry experience. These professionals create an interactive, engaging, and supportive learning environment to facilitate learning. Additionally, the student management team is readily available to assist with questions and offer support with online coursework, ensuring that students receive the necessary guidance to succeed in their studies.

At Axiom, we provide comprehensive support to help our students succeed throughout their training, whether completing homework online or tackling workplace tasks.

Zoom Support Sessions

We host open Zoom meetings, where our trainers are available to assist with any questions or challenges you may encounter during your training. These sessions provide real-time support and guidance and are typically scheduled on Monday and Wednesday nights from 5 p.m. to 7 p.m. For specific dates, please check our website.

On-Site Support at Our Somersby Facility – Friday Student Support Days

We also offer the chance to visit our new facility in Somersby, Central Coast, NSW, during our Friday Student Support Days. This dedicated time allows you to:

- Complete your online work with our trainers on hand
- Ask questions and receive personalised assistance in a supportive environment
- Complete your work tasks using on-site resources
- Get away from work or home to focus on your training.

For specific dates, please check our website or call the office.

COMPUTER SKILLS

Students must be able to use common office programs, such as Microsoft Word, Excel, and Web browsers. They must also complete our short student induction before training, which is essential to understanding the use of the e-learning platform.

COURSE FEE

\$840 excl. no GST on accredited training.

REGISTERING FOR ENROLMENT

- After you express your interest to admin@axiomcompliance.com.au, we will contact you to discuss your suitability for training.
- Complete the enrolment registration form either on our website or by having our team email you the form.
- Enrolment confirmation will be emailed with the invoice.
- After the invoice is paid, you will receive an email with the login details to start the student induction.
- When students have logged in to our online learning platform, they can access course documentation, instructions, templates, and resources, and are ready to begin the course.
- Students will receive an email confirming details of the face-to-face or online Zoom sessions.
- Your success is important to us, and we're here to help every step of the way.

TRAINING AND ASSESSMENT

The training and assessment rules for nationally recognised units/qualifications are available on training.gov.au. All registered training organisations develop their own training and assessment materials, which must meet these rules. When sourcing a training provider, it is always prudent to investigate whether the provider adheres to training package rules and standards for RTO's. Be aware that non-compliance may result in your qualification/certificate being cancelled, particularly where providers take shortcuts with assessment tasks. Axiom Compliance Learning adheres to the standards for RTO's, which is that we deliver quality training and assessment.

STUDY WITH AXIOM COMPLIANCE LEARNING

Our website contains detailed student information. We encourage all students to review this essential information carefully.
