CPPFES2039 - Identify, inspect, and test passive fire
and smoke containment.

NATIONALLY RECOGNISED
TRAINING

**Enriching
Industry
Standards**

CPPFES2039 - Identify, inspect, and test passive fire and smoke containment.

Thank you for your interest in pursuing training with Axiom Compliance Learning. Our course is designed to equip you with the necessary skills and knowledge required to identify, inspect, and test passive fire and smoke containment products and systems. Service activities are conducted in accordance with relevant Codes and Australian standards.

Our course is not just about theoretical knowledge. It's about developing practical competencies that are directly applicable to your work. This means you'll be equipped with the skills you need to excel in your role.

It's worth noting that this course is recognised as one of the competencies required for applying for the FPAS Qualified Accreditation test and inspect and related to measures or Fire Safety Assessment Qualified Accreditation.

We look forward to supporting you throughout your training journey.

LICENSING/REGULATORY INFORMATION

All work must adhere to applicable legislation and industry standards in this field. It's worth noting that certain installation, replacement, maintenance, and repair functions may only be performed by licensed trades or occupations and not by technicians. Regulatory mechanisms differ between states and territories, so students should confirm any regulatory limitations that may apply in their specific location. By staying informed about regulatory requirements and industry standards, technicians can ensure that they provide the best possible service while also complying with regulations and promoting safety.

UNITS COVERED

CPPFES2039 - Identify, inspect, and test passive fire and smoke containment.

TRAINING RECOGNITION

The training units provided by Axiom Compliance Learning are nationally accredited and in accordance with the national vocational education and training standards regulated by the Australian Skills Quality Authority (ASQA). This means that employers, industry bodies, licensing, and other relevant organisations throughout Australia recognise the quality of the training. When learners successfully complete a nationally accredited training course, they are awarded a Statement of Attainment that confirms their competency in a specific field of study.

PROGRAM OUTLINE

Blended Learning, also known as hybrid learning, is a teaching method that integrates technology-based online learning with traditional, instructor-led face-to-face classroom activities and practical tasks.

FACE-TO-FACE TRAINING

The course is delivered in one day. 8.30 am to 4 pm

To ensure the quality of the training, the number of participants in each course is limited to 8.

ONLINE LEARNING

Online learning is completed both within and outside the course, where students research, prepare, and submit their assessments via the Learning Management System (LMS). Students will research, develop procedures, and employ templates with the available resources based on genuine work performances for evaluation purposes. Students will complete interactive online quizzes corresponding to the covered subjects. To research the answers, students can refer to the course training materials, notes & other relevant references.

PRACTICAL TASKS

Students' practical tasks require them to develop various documents, service reports, and outcomes found in the industry. Tasks will be performed in the course in front of the trainer/assessor and in the workplace. The training is structured logically to enable a step-by-step learning process. The activities are presented clearly, directly linking them to course and industry information, allowing assessors to ascertain that students can competently apply their knowledge and skills. The course duration is flexible, with students having up to 3 months to complete workplace tasks.

The required work performance evidence to complete this course is as follows.

Inspect five sites in accordance with AS1851, 4072 and relevant standards.

Please note that some work performance tasks are covered in the face-to-face training.

STUDENT SUPPORT AT AXIOM

To support students on their learning journey, Axiom Compliance Learning provides the expertise of highly skilled and motivated trainers and assessors with current industry experience. These professionals create an interactive, engaging, and supportive learning environment to facilitate learning. Additionally, the student management team is readily available to assist with questions and offer support with online coursework, ensuring that students receive the necessary guidance to succeed in their studies.

At Axiom, we provide comprehensive support to help our students succeed throughout their training, whether completing homework online or tackling workplace tasks.

Zoom Support Sessions

We host open Zoom meetings, where our trainers are available to assist with any questions or challenges you may encounter while completing your workplace tasks and online work. These sessions provide real-time support and guidance and are typically scheduled on Mondays and Wednesdays from 5 p.m. to 7 p.m. For specific dates, please check our website or call the office.

On-Site Support at our Somersby facility – Friday Student Support Days

We also offer the chance to utilise our new facility in Somersby, Central Coast, NSW, during our Friday Student Support Days. This dedicated time allows you to:

- Complete your online work with our trainers on hand
- Ask questions and receive personalised assistance in a supportive environment
- Complete your work tasks using on-site resources
- Get away from work or home to focus on your training.

For specific dates, please check our website or call the office.

COMPUTER SKILLS

Students must be able to use common office programs - Microsoft Word, Excel and Web browsers.

COURSE FEE

\$420 excl. no GST on accredited training.

REGISTERING FOR ENROLMENT

- After expressing your interest to admin@axiomcompliance.com.au we will contact the student to discuss their suitability for training.
- Enrolment confirmation will be emailed.
- You will receive an email with the login details to access the online component of the course.
- When students have logged in to our online learning platform, they can access course documentation, instructions, templates, and resources, and are ready to begin the course.
- Students will receive an email confirming details of the face-to-face or online sessions.
- Your success is important to us, and we're here to help every step of the way.

TRAINING AND ASSESSMENT

The training and assessment rules for nationally recognised units/qualifications are available on training.gov.au. All registered training organisations develop their own training and assessment materials, which must meet these rules. When sourcing a training provider, it is always prudent to investigate whether the provider adheres to training package rules and standards for RTO's 2015. Be aware that non-compliance may result in your qualification/certificate being cancelled, particularly where providers take shortcuts with assessment tasks. Axiom Compliance Learning adheres to the standards for RTO's 2015, which is that we deliver quality training and assessment.

STUDY WITH AXIOM COMPLIANCE LEARNING

Our website contains detailed student information. We encourage all students to review this essential information carefully.
